This is the 2nd edition of Tracking with Steve and Jennifer White. It is the original footage from a 2005 seminar, but has been totally re-edited and enhance both visually and audio. It now includes power point slides and is menu driven. It also includes a data disc with hand-outs and the power point in pdf format.

This seminar was taped in Sacramento, California and was sponsored by the Sacramento Dog Training Club. The video includes lecture, video presentations, power point graphics, and hands-on tracking instruction. There are at least two methods each for tracking, article identification and scent discrimination. The class works with their dogs using the lessons learned in the lecture. It is a hands-on seminar with lots of outdoor tracking experience. The focus is on getting the dog ready to pass the **VST TRACKING PROGRAM**.

This new version with menus makes it much easier to see the steps of training and then work with your dog and be able to come back to the video for a review or the next step. Easy to follow
